

Welcome to TLC's *Sista Project*. This project was created for all of our transfeminine sistas who may be walking alone. The purpose of the *Sista Project* is to provide transgender women with the kind of support and social interaction that will build and enhance confidence, safety, and self-esteem through teamwork and clinical support. The *Sista Project* will serve to increase the availability of safe places to share real-life undertakings, the tasks of being a woman, and the real-life issues that can be shared with peers, and create personal growth.
